

# Preschool Classroom

**Theme of the Week:  
Going Green Summer  
Energy**

Week of August 2-6, 2010

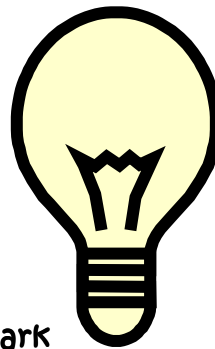

**Little Canada**

**Monday: Wind Power**

Art: Tissue Paper Kites  
Hall: Stringing Beads  
Table: Cutting Activity  
**Soccer**

**Tuesday: Electricity**

Art: Light Bulbs  
Hall: Pattern Blocks  
Table: Flashlights

**Wednesday: A Day in the Dark**

**Park Day – Remember sunscreen and tennis shoes. Please bring in a bag lunch with drink for the park.**  
**A Day in the Dark!**

**Thursday: Solar Power**

Art: Hand Print Suns  
Hall: Web of Life-How Things Grow From One Another.  
Table: Play Dough Play

**Friday:**

Walton's Hollow Petting Zoo  
**Water Play Day**  
**Swimming**

**CHILDREN'S  
DISCOVERY**

ACADEMY OF EARLY LEARNING

Our computer has seen better days. If anyone has a computer that they would like to donate to our classroom, we would be happy to look at it.

A look at last week...  
Water in Our World Week

We learned a lot about the water cycle this week. We talked about how water starts as a cloud. When the cloud gets heavy it begins to rain. After the rain there are puddles which produce water vapor that goes into the air. Those water vapors turn into some water droplets that eventually become a cloud again.

We talked about what kinds of animals live in water such as frogs and turtles.

For art we made fun frog puppets, played in the sensory table with water animals and made a water color painting.

Our field trip was the favorite part of the week. Swimming, playing at the park and Happy Meals from McDonalds. Yum Yum.

Happy Birthday to **Ayri**, Who will turn 4 years old on Sunday.
